

## ChickenTon Terms of Service

Last Updated: 06.11.2025

### 1. Platform Context and Jurisdiction

ChickenTon operates exclusively within the Telegram ecosystem, including the Telegram Mini App and the bot @ChickenTongamebot. By using ChickenTon, you also agree to Telegram Terms of Service, Telegram Bot Platform Rules, and Telegram Mini Apps Guidelines. Telegram is not responsible for ChickenTon operations or virtual currency.

### 2. Virtual Currency Stars

Stars is an internal virtual currency with no real-world monetary value. Users do not own Stars. Mechanics may change at any time. No compensation is provided.

### 3. User Accounts and Telegram Identity

Access is based on your Telegram account. One user = one Telegram account = one ChickenTon account. If your Telegram account is restricted or deleted, access may be lost.

### 4. Multi-Account Ban Policy

Creating or managing more than one ChickenTon account is strictly prohibited. Use of fake devices, automation tools, identity manipulation, or other bypass methods is considered abuse. The Project may block all related accounts and permanently deny processing of any withdrawal-related requests.

### 5. Financial Disclaimer

ChickenTon is an entertainment project. Stars is not a financial product. We do not provide financial services or guarantees. The presence of withdrawal features does not obligate the Project to process them.

### 6. Limitation of Liability

The Service is provided “as is.” The Project is not responsible for Telegram outages, API limitations, data loss, errors, or expectations of profit.

### 7. User Conduct

Users must not automate gameplay, interfere with the bot, exploit vulnerabilities, distribute harmful code, or engage in illegal behavior.

## 8. Changes to Terms

The Project may update these Terms. Continued use constitutes acceptance.

## 9. Termination of Access

The Project may restrict or terminate access without explanation.

## 10. Age Requirement

The Service is for users 18+ only. Underage accounts will be blocked.

## 11. Data Processing on Telegram Servers

Some data necessary for account operation and authentication is processed on Telegram infrastructure, as part of the platform's technical requirements.

## 12. Application Location

The ChickenTon application operates through @ChickenTongamebot.
