

# **ChickenTon Privacy Policy**

Last Updated: 06.11.2025

## **Introduction**

ChickenTon operates within the Telegram ecosystem, including the Mini App and the bot @ChickenTongamebot. By using the Service, you agree to this Privacy Policy and Telegram's own data rules.

### **1. Information We Collect**

We collect non-personal information (device type, language, gameplay actions, analytics) and personal information (Telegram user ID, username, profile picture if available, gameplay history, support communication, device/IP data for security).

### **2. Cookies and Analytics**

Cookies and analytic tools may be used to improve the Service. Disabling cookies may reduce functionality.

### **3. How We Use Information**

Information is used to operate the Service, authenticate users, detect fraud and multi-accounting, maintain security, analyze gameplay, improve experience, and provide communication. No user data is sold.

### **4. Sharing Information**

Data may be shared with infrastructure providers, analytics services, and security partners. Telegram also processes some user data as part of its platform.

### **5. Third-Party Services**

The Project is not responsible for external links or third-party websites.

### **6. Data Retention**

Data is stored as long as necessary for operation, security, and legal compliance. Users may request deletion. Some data may be retained to prevent abuse.

### **7. Data Protection**

Industry-standard protections are used, but absolute security cannot be guaranteed, especially since Telegram controls part of the infrastructure.

## **8. Advertising**

Advertising identifiers may be used for personalized ads. Users may restrict tracking in device settings.

## **9. Corporate Changes**

If the Project ownership changes, data may be transferred to the new operator under the same obligations.

## **10. Minors (18+)**

The Service is for adults 18+. Data from minors is deleted upon detection.

## **11. Virtual Currency Stars**

Stars has no monetary value. Data about Stars usage is analyzed to detect fraud, abuse, and multi-accounting.

## **12. Processing on Telegram Servers**

Some data is processed or stored on Telegram servers as required for Telegram authentication, mini app functionality, and bot-level operations.

## **13. Policy Updates**

Updates may occur at any time. Continued use means acceptance.

## **14. Contact**
